Phase I • Entailed major Kitchen renovations/upgrades, the twelve 1st and 2nd Grade Classrooms for each building, and construction of a new Gymnasium addition. This work was completed in August 2011 for the start of the 2011-2012 school year.

Phase II • Included renovations/upgrades to eleven 3rd & 4th Grade Classrooms for each building.

Phase III • The final phase of these projects included renovations to the Media Center, Student Dining, Administrative Offices, and three Kindergarten Classrooms for each building. These dramatic improvements to the three buildings entailed revised Kitchen areas, new roofing systems, updated HVAC, more efficient lighting, and multiple technology upgrades. Parking and traffic patterns were modified along with the asphalt work for each building. The focus of these projects is that all classroom spaces are now housed inside the building, eliminating the need for modular classrooms.
